

TECHNIDATA Medical Software and Lacroix Labo Privé Inc. reach a 3-year partnership agreement.

Montreal, July 5th 2022

TECHNIDATA, developer and supplier of software solutions for medical laboratories, secured a partnership agreement with Lacroix Labo Privé Inc., member of Group Médical Lacroix Inc., to provide innovative information and data management solutions.

The mission of the Lacroix Medical Group, the leading network of private medical clinics in Quebec, is to provide the best alternative to the public health system. It offers an alternative to health-conscious users who wish to have access to health care provided in the shortest time possible, without compromising the quality of service. Building on its development over the past few years, Lacroix Medical Group has chosen to invest in innovative software solutions to provide the best quality of service to its users through Lacroix Labo Privé Inc.

A strong partnership

Following several discussions focused on collaboration, Lacroix Labo Privé Inc. has decided to trust TECHNIDATA to benefit from the latest developments in software solutions.

This new contract with an initial duration of 3 years seals a strong partnership between the two companies.

Thanks to this agreement, the latest version of TECHNIDATA's Laboratory Information System, ^{TD}NexLabs 2.0 will be installed in Lacroix Labo Privé's central laboratory.

^{TD}NexLabs 2.0 is a new generation laboratory management system, dedicated to biology (including biochemistry, haematology, immunology, serology, virology, and microbiology...), and designed to improve the performance of the laboratory organization and the quality of care. ^{TD}NexLabs 2.0 integrates ^{TD}Micro, a module entirely dedicated to microbiology, which provides access to true paperless microbiology and thus guarantees optimal traceability.

« We are delighted to begin our partnership with Lacroix Labo Privé and are ready to support them in their future developments. We are innovating to provide software solutions that are suitable to our customers' needs and to meet increasing regulatory requirements, » stresses Pierre Grignon, General Manager North America, TECHNIDATA Medical Software.

This partnership will be expanded in the coming months with the installation of ^{TD}Mind, a unique middleware that will connect and monitor all of Lacroix Labo Privé's analytical production units. It will ensure the follow-up of internal and external quality controls, the follow-up of maintenance, the traceability of reagents and the microscopic image

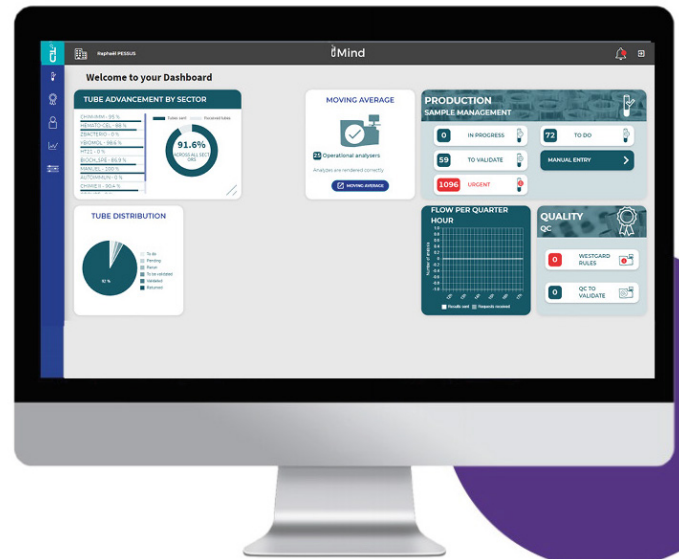

recording among other valuable functionalities. Accessible through a web browser from all workstations, ^{TD}Mind meets the cybersecurity, scalability and performance needs of laboratories.

« Lacroix Labo Privé Inc., a division of Lacroix Medical Group Inc, has chosen to optimize its software solutions and rely on TECHNIDATA to fulfill its need for a laboratory management system. This represents a major investment for us that will allow us to maximize traceability, facilitate laboratory management and, of course, improve patient experience," emphasizes Mr. Alexandre Lemieux, Vice-President, Groupe Médical Lacroix.

With this momentum, TECHNIDATA confirms its commitment to support its clients in achieving their objectives of maximizing efficiency, diagnostic expertise and patient safety.

« We are delighted to begin our partnership with Lacroix Labo Privé and are ready to support them in their future developments. »

Pierre Grignon,
General Manager, North America,
TECHNIDATA Medical Solutions
